DENON INTRODUCES ADVANCED MULTI-TUNER, HDMI VIDEO PROCESSOR/SWITCHER AND MULTI-ZONE POWER AMPLIFIER FOR CI MARKET

-- Super-Reliable Multiple Source Tuner with Expansion Slots, Power Amplifier and Video Processor All Created to Meet the Needs of the Custom Integration Marketplace --

Mahwah, NJ – September 6, 2007 — Denon Electronics, one of the world's premier manufacturers of high-quality home entertainment components, is demonstrating its commitment to the professional custom integration (CI) marketplace with the upcoming introduction of three new high-performance components, each specifically designed with the reliability, features and integratability needed to meet the demands of this segment. The Denon® **TU-604CI Expandable Multi-Tuner** (SRP: \$999), **DVP-602CI HDMI Video Processor/Switcher** (SRP: \$2,499), and **POA-3012CI Multi-Zone Amplifier** (SRP: \$1,999) will be showcased at the company's CEDIA 2007 Booth (# 204).

Jeff Talmadge, Director, Product Development and Systems Integration noted, "The introduction of these three new CI-dedicated, high-end components indicates Denon's commitment to leading the way in custom installation whole-house audio distribution and high-end video processing. Through every aspect of the design and engineering process, our focus was on creating reliable products that custom integrators could depend on to perform perfectly, year in and year out – and not have to worry about going back to service or replace. All provide features and capabilities that offer new and useful solutions for home entertainment system building. Our rugged TU-604CI Expandable Multi-Tuner, for instance, is simply one of the world's most advanced multi-zone tuners, with a variety of features that ensure the ultimate in flexibility, performance and future-readiness."

TU-604CI Expandable Multi-Tuner: New Possibilities for High-Quality Music Distribution

Denon's new TU-604CI provides custom integrators with a host of new and exciting options for high-quality multi-zone music distribution throughout the home. It features dual AM/FM tuners pre-installed, with four optional slots for Plug & Play tuner cards. These slots can be filled with AM/FM, HD Radio and XM satellite radio ready cards (subscription required), providing access to some of today's most exciting radio content. Card modules will be available starting at \$99.

An Ethernet port offers control and configuration via PCs, and like other Denon CI-designated products, the TU-604CI features the company's Remote Maintenance feature, which allows custom integrators to diagnose, correct, update and remotely perform maintenance on the units without the need to travel to their customer's home. In case of error or lost settings, the custom integrator can remotely restore all of a customer's settings from their office. Other CI-friendly features include detachable power cord, assignable high output DC triggers. The TU-604CI also features compatibility with AMX/Crestron Control Systems via the RS-232C port.

DVP-602CI HDMI Video Processor/Switcher Video Processor

The ultimate video-enhancement add-on component, Denon's new Video Scaler uses the powerful and Emmy Award Winning Silicon Optix Realta chipset to ensure superior video performance, with upconversion and scaling to 1080p from all analog and digital sources. The unit's HDMI1.3a switching capability with Deep Color support ensures the ultimate video performance with display devices, and thanks to its switching capability between 6 inputs and simultaneous output to 2 monitors, it affords an easy solution for multi-display home entertainment installations. The DVP-602CI will also implement Silicon Optix Realta Noise Reduction Circuitry and perform image correction on HD video signals from Blu-ray Disc players or HD-DVD players, ensuring the highest quality video signal is being passed along to today's high definition displays.

Full 10-bit processing and multi cadence detection, Realta Noise Reduction and Denon Pixel Image Correction all combine to further enhance video performance. Notably, the DVP-602CI is capable of outputting multiple resolution selections to match monitors/displays.

POA-3012CI – Power Amplifier: 12-Zone Performance for Distributed Audio Systems

The POA-3012CI is a fully configurable power amplifier that provides impeccable audio reproduction in up to 12 different zones (twelve in mono, six in stereo) throughout the home/business. It features 30 Watts X 12 channel or 120 Watts x 6 of distributed power, and is designed to deliver superb sound from both analog and digital sources. The rugged chassis and high-quality components are built for long life and performance. Notably, the amplifier allows custom integrators to combine it with other amps for virtually unlimited multi-zone capability in large-scale applications. The POA-3012CI features RCA jack inputs for connecting sources. Other custom integration friendly features include Auto Sense Power On, detachable power cord, assignable high output DC triggers, RS-232C port for use with third party control systems and link control for use with Denon's Power controller. A built-in Ethernet port affords 3rd party command and control.

All three products are slated to be available in December 2007.

About Denon Electronics

Denon is a world leader in the manufacture of the highest quality home theater, audio and software products.
