DENON® ADDS THREE NEW TRENDSETTING MODELS TO ITS ACCLAIMED “IN-Command Series™” LINEUP OF NETWORK-CAPABLE RECEIVERS

*-- Powerful Models Raise the Bar in Networking and Easy Access to Multiple Content Sources;
Feature Streamlined New Design, Built-In AirPlay® and More --*

Mahwah, NJ, May 16, 2012 — Denon Electronics, a premier manufacturer of high-quality home entertainment components, today announced the introduction of three additions to its acclaimed **IN-Command Series** of home theater receivers, providing consumers with exciting new ways to take command and control of all their home entertainment. The new receivers, including the **AVR-3313CI** (SRP:\$1199.99), **AVR-2313CI** (SRP:\$899.99) and **AVR-2113CI** (SRP:\$649.99) all feature a robust new content services platform, streamlined new design and easy-to-access front-panel inputs, as well as 4K video capability. Notably, all three feature access to popular content sources including Sirius XM, vTuner Internet radio and Pandora**. Purchasers of IN-Command receivers can also download a free upgrade for the new Denon Remote App, allowing them to control their receiver via iPhone, iPad or iPod touch.

Design and Feature Enhancements for Greater Ease-of-Use and Access

There are several design differences that users will immediately recognize in the new IN-Command models. They all feature a streamlined front-panel design, larger character displays, richer graphics on their newly designed GUI interfaces, and the simplest AV receiver remote

controls in the industry – all of which combine to make them the most user-friendly receivers Denon has ever introduced.

New Ways to Take Charge of Home Entertainment

The 'IN' in 'IN-Command' stands for Integrated Network, and like Denon's initial offerings in the series, the new models meet the needs of today's "content-hungry" consumers, allowing them to enjoy music, movies and games with dramatically enhanced surround sound, multi-zone networking and more. Notably, with their AirPlay capabilities, the new receivers allow users to stream their iTunes music whether from Mac or PC, as well as music stored on their iPhone, iPad, or iPod touch.* The new receivers also feature Direct Connectivity for iOS devices via a front panel USB input. The new In-Command AV receivers offer an unprecedented level of expandability and connectivity, making them ideal hubs for true state-of-the-art home entertainment systems.

Reflecting Denon Heritage of Audio Excellence

Superior audio performance has always been a hallmark of Denon, and the new IN-Command receivers are no exception. All three models feature a minimum signal path, anti-jitter circuit design, 24-bit/192-kHz DACs, as well as Audyssey Dynamic Volume, Audyssey Dynamic EQ and Audyssey MultEQ XT.

AVR-3313CI: The Epitome of Connectivity, Control and System-Building Flexibility

The elegantly designed Denon AVR-3313CI represents the pinnacle of technology and common-sense features in today's digital home entertainment universe. With its metal front panel and flip-down door, it is a stately addition to any system, and with 125 watts per channel, it delivers more than enough power for the largest of rooms and the most demanding of speakers. The AVR-3313CI can be the centerpiece of a three-zone system, including the main room plus two additional playback areas, with independent sources available for each zone. The unit's seven HDMI inputs allow for a one wire connection for both picture and sound from most newer audio/video sources, such as set-top boxes, gaming consoles, and Blu-ray players.

The AVR-3313CI incorporates true multi-zone HDMI audio/video distribution with the inclusion of HDMI matrix switching functionality. Equipped with three HDMI outputs (2 x parallel, 1 x

discrete), the AVR-3313CI allows for the connection of up to three different HDMI equipped displays; users can now send two different HDMI feeds to two displays at the same time directly from the receiver, eliminating the need for costly external switches and extra remote control complexity.

IN-COMMAND Also Means Custom Integration-Friendly

Custom integrators will appreciate the fact that Audyssey MultEQ XT Auto Setup and Calibration are included in all three units, allowing for total ease and accuracy of set-up, along with the ability to use the advanced Audyssey Pro installer package (in Models AVR-2313CI and AVR-3313CI), which measures ideal sonic performance in up to 32 different positions, defining the ultimate sound quality for virtually any size or shaped room. The units also feature remote access via the Internet, RS-232 and IP Control for third-party controllers and are Control4 certified.
