The AVR-X5200W is a powerful 9 channel amplifier with 11.2 channel processing and 13.2 preout. A discrete monolithic amplifier with custom made DHCT (Denon High Current Transistors), to be precise. With dual Wi-Fi antenna and Bluetooth® built in, it is perfectly set for all wireless services. Thus its native support for Spotify Connect®, gapless playback capability and DSD streaming round up the immaculate network experience. Via its 8 HDMI inputs (including one on the front panel) it handles 4k 60Hz pass through, and even upscales video to 1080p and 4k 60Hz. Brand-new Dolby Atmos, triple HDMI outputs with multi-source/multi-zone functionality and integrated Audyssey MultEQ XT32/Sub EQ HT/LFC to guarantee the ideal calibration of your setup, makes the AVR-X5200W the best in its class.
Built-in Bluetooth, Wi-Fi, AirPlay and DLNA

Stream your favorite tracks wirelessly to the AVR-X5200W directly from your Bluetooth-enabled portable devices, such as a smartphone, portable media player and tablet. The AVR-X5200W can recognize and remember up to 8 Bluetooth portable devices, so your family and friends can enjoy their favorite tracks. With the built-in Wi-Fi feature, you can connect the AVR-X5200W to your home network wirelessly and open up a whole new world of content streaming functions, including thousands of internet radio stations as well as the ability to stream subscription service Spotify Connect, Pandora®, and SiriusXM™. With AirPlay®, you can wirelessly stream your favorite audio tracks directly from your iOS® device, including the iPod®, iPod touch® and iPad®. DLNA 1.5 certification lets you enjoy streaming content via your PC, Mac or Android® device. Via our Denon Remote App, you can wirelessly control the AVR-X5200W from your favorite portable device. The Denon Remote App is available in iOS and Android versions, and is also available for the Kindle Fire™.

Equipped with 7+1 input and 2+1 output HDMI terminals that fully support next-generation 4K displays

Eight systems are provided for the 4K video signal supporting a maximum of 8 systems capable of simultaneous output to allow the HDMI input video and audio to be output to a sub-zone.

NEW FEATURES

- Built-in Wi-Fi with dual antenna
- Built-in Bluetooth
- Latest HDMI standard with 4K Ultra HD Scaling up to 60Hz and 4:4:4 color resolution
- Dolby Atmos (5.1.2, 5.1.4, 7.1.2, 7.1.4*, 9.1.2*)
- 8 HDMI inputs (incl. 1 front)
- Three HDMI outputs (2 main + zone out)
- 11.2ch processing 13.2ch pre-out
- ISF certification
- DSD streaming
- AFG streaming
- Spotify Connect
- Audyssey MultEQ® XT32 and Sub EQ HT for higher resolution room correction
- Support 4K video to enjoy 4 times higher resolution videos
- Audyssey MultEQ XT32 and Sub EQ HT for higher resolution room correction
- Audyssey LFC for best late-night bass experience without disturbing neighbors
- Audyssey MultEQ for best late-night bass experience without disturbing neighbors

POWERFUL 9 CHANNEL DISCRETE AMP WITH ECO MODE

With each channel rated at 140 watts (6 ohms, 20Hz - 20 kHz, THD 0.08%, 2ch driven), the AVR-X5200W features a monolithic power amplifier design with custom made power transistors and identical circuit topology on all 9 channels. Our new Eco Mode provides the ability to reduce overall power consumption and features an on-screen Eco Meter that lets you see the power consumption reduction effect. The Auto Eco mode automatically switches between normal and Eco modes, depending on the volume level chosen, and the power amplifier block is rated to drive low impedance speaker loads, down to 4 ohms, for compatibility and stability with virtually any loudspeaker model.

AUDYSSEY MUSEQ XT32®/SUB EQ HT®/LFC

It is the most accurate room correction solution with more than ten thousand individual control points allowing finer details of the room’s problems to be captured and corrected. The ultra high resolution filters are applied to all channels including the two independent subwoofers, with the most obvious benefit being heard in the low frequency range where correction is needed the most. Audyssey LFC uses psychoacoustic algorithms to prevent bass from passing your walls and disturbing your neighbors while maintaining the bass performance in the listening room. The AVR-X5200W is also Audyssey Pro ready for the most advanced professional room correction.

STATE-OF-THE-ART DENON SOLUTIONS FOR MAXIMIZING CONTENT QUALITY

- Monolithic amplifier design with identical power and quality for all 9 channels (140 watts per channel (6 ohms, 20Hz - 20 kHz, THD 0.08%, 2ch driven))
- Dynamic Discrete Surround Circuit, D.D.S.C-HD with AL24 Processing Plus, Denon Link HD
- Dolby Atmos, Dolby TrueHD and dts-HD Master Audio
- High-performance 192kHz/24-bit DA converters for all channels
- Audyssey DSX and DTS Neo:X 11.1 for the ultimate surround experience
- Digitally transmitted Play function for iPod and iPhone (via USB) for best sound quality
- Support 4K video to enjoy 4 times higher resolution videos than current HD on larger displays and screens.
- Audyssey MultEQ XT32 and Sub EQ HT for higher resolution room correction
- Audyssey LFC for best late-night bass experience without disturbing neighbors

EASE-OF-USE AND OTHER FEATURES

- Setup Assistant, providing easy-to-follow setup instructions with Graphical User Interface
- Horizontal color-coded layout of speaker terminals for easy connection
- Label sheet for marking Speaker Wires & HDMI Cables
- Audyssey Dynamic Volume, for real-time volume adjustment
- Audyssey DynamicEQ, improves surround effects during low volume levels
- Comes with simple, easy-to-use remote control handset
- Denon Remote App for iOS and Android
- 4 Quick Select buttons and RC buttons - can be used to store favorite sources, internet radio stations and preferred settings
- Sleep Timer, set up to 120 minutes in 10-minute increments
- Standby HDMI Pass Through
- RS232C for custom installation purpose
- 9 Zones Multi-room/Multi-source
